

SHAHRIILL A J
Founder & Chief
Training Officer

Shahrill is the Founder / Lead Consultant of his firm, Nu Quest Management, with offices in Kuala Lumpur, Jakarta, Canada and soon India. Since he left Ngee Ann Polytechnic, on 1st April 2000, he has reached over 25,000 people with his enthusiastic and inspiring messages of professional and organizational success. His unique and entertaining approach to reaching success unfolds at the workshops as he draws on everything from his personal life roadmap to ever popular theme pop songs.

Shahrill has personally applied each of the principles he talks about in his programs. Shahrill knows first-hand what it takes to transform a mediocre or negative attitude into a positive one! (and how to take a positive attitude to an even higher level). He communicates with sincerity, clarity and impact - in a way that touches the minds and hearts of those in the audience. Of course, the greatest material in the world is of little use unless it is delivered in a way that is exciting, entertaining and relevant to everyone in the audience. That is why Shahrill involves the audience throughout his program, but without using embarrassing exercises that turn some people off. And, one of Shahrill's ground rules is that everyone is entitled to laugh and have some fun during his workshops - because humor contributes to the learning environment. When learning is fun, it is more memorable.

He is often been called upon to conduct various corporate and professional courses in Malaysia, Indonesia, Thailand, China and other parts of the world. In January 2003, he was one of the distinguished speaker at a Human Capital Conference held in Singapore. And since September 2002 he has often been interviewed to share his thoughts and views on the development of HRD in the industry, particularly on team development. In recent times, he has been frequently invited to be one of the learning facilitator for dignitaries from Indonesia and also for senior public service officers from the Commonwealth countries.
